1. INTRODUCTION

1.1 PURPOSE

The Software Design Document (SDD) for the MySebenarnya System serves as a detailed blueprint for the system's architecture and design, ensuring all components and their interactions are clearly defined. Its primary purpose is to guide developers during implementation, establish design goals and constraints, and demonstrate how the design meets functional and non-functional requirements. The SDD facilitates communication among stakeholders, supports future maintenance, and improves project management by providing a clear understanding of the system's structure, functionality, and dependencies. By aligning the design with project objectives, the SDD ensures the system is developed efficiently and effectively. Additionally, the SDD functions as a binding contract between the development team and the customer, ensuring mutual agreement on the design specifications and expectations. This alignment minimizes misunderstanding and scope creep, establishing accountability and trust throughout the development process.

1.2 SYSTEM IDENTIFICATION

The system uses the following identification format: SDD-MSS-2025vX-XXX

1.3 SYSTEM OVERVIEW

The proposed system, provisionally named MySebenarnya, is a web-based platform designed to support the Malaysian Communications and Multimedia Commission (MCMC) in addressing the growing concern of misinformation. The primary objective of this system is to provide a centralized and structured channel for the public to submit inquiries regarding the authenticity of news, while enabling MCMC and relevant government agencies to process, investigate, and respond to these inquiries in an organized and transparent manner.

Module 1: Manage User

This module manages user access and profile functionality for public users, MCMC staff, and agency staff. Public users are required to register with a valid email and verify their account before accessing the system. Profile management features include editing personal details and updating passwords. MCMC staff have the ability to register agencies, view all user data, and generate detailed user reports. Agency staff receive login credentials via email and are required to reset their passwords upon first login. The system ensures secure access, role-based login, and comprehensive user data management.

Module 2: Manage Inquiry Form Submission

This module allows public users to submit inquiries for verifying the authenticity of news. Each submission includes supporting evidence and relevant details. Users can view their inquiry history and browse public inquiries in a structured, searchable format. MCMC staff are responsible for filtering and validating inquiries before forwarding them to the appropriate agencies. Inquiry reports can be generated and exported in various formats, with visual summaries to support analysis. Agencies have access to view, filter, and review all past inquiries assigned to them.

Module 3: Inquiry Assignment (to Agencies)

This module provides for effective assignment and tracking of verified public inquiries to suitable verification agencies. MCMC staff are responsible for reviewing the inquired queries submitted and allocating them to the most suitable registered agencies, with an option of appending comments or remarks for context. Once assigned, public users can view the assigned agency processing their inquiry as well as the assignment date, providing transparency in the process.

Agencies that receive inquiries must think about whether the case falls within their jurisdiction. If it does, they proceed with verification; otherwise, they can officially decline the assignment with a reason and a notice to MCMC. MCMC will redistribute the inquiry to

SDD-MSS-2025v1

a more appropriate agency if necessary. The system also enhances communication through comments when declining inquiries by enabling agencies to add comments.

Additionally, the module offers dependable reporting functions to allow MCMC to analyze assignment trends, monitor agency workloads, and support efficient inquiry distribution. The reports can be filtered by date and agency, represented graphically as chart or graphical form, or exported to PDF or Excel for documentation and further analysis.

Module 4: Inquiry Progress Tracking

This module provides real-time tracking of inquiry status for all users. Public users can view the current status of their submissions, including labels such as “Under Investigation,” “Verified as True,” “Identified as Fake,” or “Rejected.” A complete inquiry history with status updates and timestamps is available through the user dashboard. MCMC staff can monitor agency responses and generate performance reports based on resolution times and inquiry outcomes. Agencies are responsible for updating inquiry statuses and may include investigation notes and supporting documents. Communication features enable collaboration between agencies and MCMC during the verification process.

2.2 DATA DICTIONARY

Table 2.1 Public User

Field Name	Description	Data Type	Constraint
publicUserID	Unique identifier for public user.	INT	PRIMARY KEY, NOT NULL
PublicName	Name of the public user.	VARCHAR(100)	NOT NULL
PublicEmail	Email address of the public user.	VARCHAR(100)	UNIQUE, NOT NULL
PublicPassword	Encrypted password of public user for login.	VARCHAR(8)	NOT NULL
ContactNo	Phone number of public user.	INT	NOT NULL

Table 2.2 MCMC Staff

Field Name	Description	Data Type	Constraint
staffID	Unique identifier for MCMC staff.	INT	PRIMARY KEY, NOT NULL
staffEmail	Email address of the MCMC staff.	VARCHAR(100)	UNIQUE, NOT NULL
staffPassword	Encrypted password of MCMC staff for login.	VARCHAR(8)	NOT NULL
staffName	Name of the MCMC staff.	VARCHAR(100)	NOT NULL
staffContactNo	Phone number of MCMC staff.	INT	NOT NULL

Table 2.3 Agency

Field Name	Description	Data Type	Constraint
agencyID	Unique identifier for the agency.	INT	PRIMARY KEY, NOT NULL
agencyEmail	Email address of the agency.	VARCHAR(100)	UNIQUE, NOT NULL
agencyTempPass word	Temporary password assigned initially.	VARCHAR(8)	NOT NULL
agencyPassword	Final encrypted password of agency for login.	VARCHAR(8)	NOT NULL
agencyName	Name of the agency.	VARCHAR(100)	NOT NULL
agencyContactNo	Contact number of the agency.	INT	NOT NULL

SDD-MSS-2025v1

Table 2.4 InquirySubmission

Field Name	Description	Data Type	Constraint
inquiryID	Unique identifier for the inquiry.	INT	PRIMARY KEY, NOT NULL
submissionTitle	Title of the inquiry.	VARCHAR(100)	NOT NULL
submissionDate	Date of submission.	DATE	NOT NULL
submissionTime	Time of submission.	TIME	NOT NULL
publicUserID	Unique identifier for the public user.	INT	FOREIGN KEY, NOT NULL
staffID	Unique identifier for the MCMC staff.	INT	FOREIGN KEY, NOT NULL
submissionStatus	Current status of the submission.	VARCHAR(50)	NOT NULL
newsLink	URL link related to the inquiry.	VARCHAR(200)	NULL
submissionDescription	Description of the submission.	VARCHAR(300)	NOT NULL

Table 2.5 InquiryAssign

Field Name	Description	Data Type	Constraint
inquiryAssignID	Unique identifier for the assignment.	INT	PRIMARY KEY, NOT NULL
staffID	Unique identifier for the MCMC staff.	INT	FOREIGN KEY, NOT NULL
agencyID	Unique identifier for the agency.	INT	FOREIGN KEY, NOT NULL
inquiryID	Unique identifier for the inquiry.	INT	FOREIGN KEY, NOT NULL
assignDate	Name of the Date the inquiry was assigned.	DATE	NOT NULL

Table 2.6 TrackProgress

Field Name	Description	Data Type	Constraint
progressID	Unique identifier for the progress entry.	INT	PRIMARY KEY, NOT NULL

updateStatus	Status update from the agency.	VARCHAR(100)	NOT NULL
agencyID	Unique identifier for the agency.	INT	FOREIGN KEY, NOT NULL
inquiryAssignID	Unique identifier for the assignment.	INT	FOREIGN KEY, NOT NULL
staffID	Unique identifier for the MCMC staff.	INT	FOREIGN KEY, NOT NULL

Table 2.7 Report

Field Name	Description	Data Type	Constraint
reportID	Unique identifier for the report.	INT	PRIMARY KEY, NOT NULL
inquiryID	Unique identifier for the inquiry.	INT	FOREIGN KEY, NOT NULL
inquiryAssignID	Unique identifier for the assignment.	INT	FOREIGN KEY, NOT NULL
staffID	Unique identifier for the MCMC staff.	INT	FOREIGN KEY, NOT NULL
summary	Summary of the report.	VARCHAR(1000)	NOT NULL
progressID	Unique identifier for the progress entry.	INT	FOREIGN KEY, NOT NULL
publicUserID	Unique identifier for the public user.	INT	FOREIGN KEY, NOT NULL

Module 3 (YASHVINKUMAR A/L G PARTHIBAN, CB23025)

Table 2.3 Agency

Field Name	Description	Data Type	Constraint
agencyID	Unique identifier for the agency.	INT	PRIMARY KEY, NOT NULL
agencyEmail	Email address of the agency.	VARCHAR(100)	UNIQUE, NOT NULL
agencyTempPass word	Temporary password assigned initially.	VARCHAR(8)	NOT NULL
agencyPassword	Final encrypted password of agency for login.	VARCHAR(8)	NOT NULL
agencyName	Name of the agency.	VARCHAR(100)	NOT NULL
agencyContactNo	Contact number of the agency.	INT	NOT NULL

Table 2.5 InquiryAssign

Field Name	Description	Data Type	Constraint
inquiryAssignID	Unique identifier for the assignment.	INT	PRIMARY KEY, NOT NULL
staffID	Unique identifier for the MCMC staff.	INT	FOREIGN KEY, NOT NULL
agencyID	Unique identifier for the agency.	INT	FOREIGN KEY, NOT NULL
inquiryID	Unique identifier for the inquiry.	INT	FOREIGN KEY, NOT NULL
assignDate	Name of the Date the inquiry was assigned.	DATE	NOT NULL

Table 2.7 Report

Field Name	Description	Data Type	Constraint
reportID	Unique identifier for the report.	INT	PRIMARY KEY, NOT NULL
inquiryID	Unique identifier for the inquiry.	INT	FOREIGN KEY, NOT NULL
inquiryAssignID	Unique identifier for the assignment.	INT	FOREIGN KEY, NOT NULL
staffID	Unique identifier for the MCMC staff.	INT	FOREIGN KEY, NOT NULL
summary	Summary of the report.	VARCHAR(1000)	NOT NULL
progressID	Unique identifier for the progress entry.	INT	FOREIGN KEY, NOT NULL
publicUserID	Unique identifier for the public user.	INT	FOREIGN KEY, NOT NULL

3. GENERAL ARCHITECTURE

3.1 APPLICATION LAYER

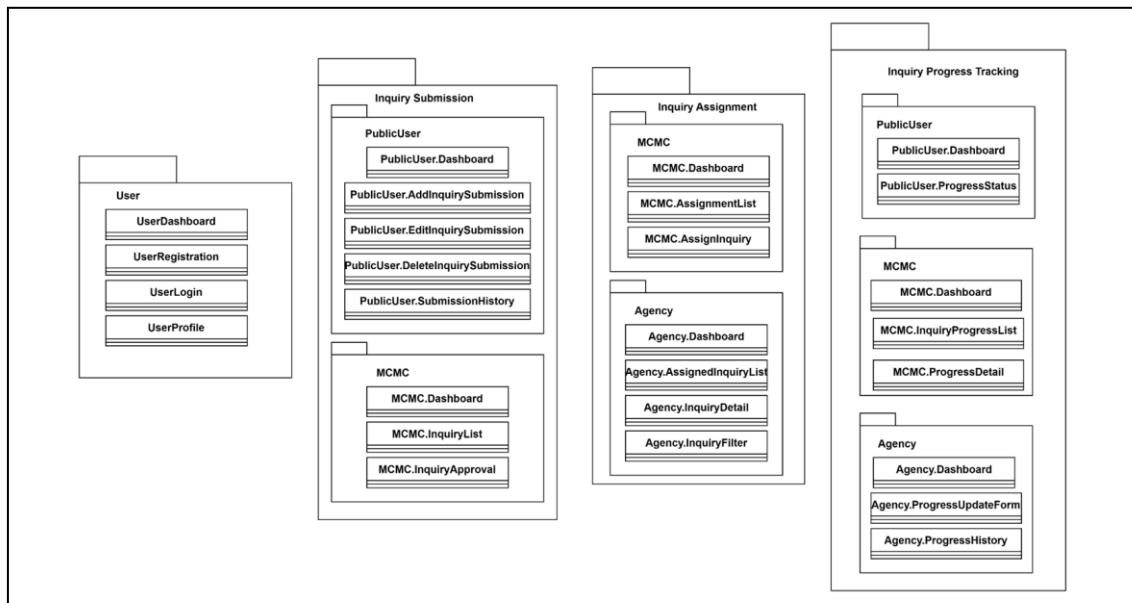

Figure 3.1 Application Layer for MySebenarnya Systems

Table 3.1 User Package [SDD-MSS-2025v1-P01]

Class Name	Description
UserDashboard	The landing page before login shows the overview of the system.
UserRegistration	A class that allows public users to create a new account by filling necessary registration details.
UserLogin	A class that handles the login interface where users enter their credentials to access the system.
UserProfile	A class that shows the user's profile information and provides an interface to update it like name, contact, etc.

Table 3.2 Inquiry Submission Package [SDD-MSS-2025v1-P02]

Class Name	Description
PublicUser.Dashboard	Main dashboard for public users that give access to view public user profile, submission form, view past submissions and status of submission.
PublicUser.AddInquiry Submission	A class that handles new inquiry creation, input validation and submission.
PublicUser.EditInquiry Submission	A class that allows editing of unprocessed inquiries.
PublicUser.DeleteInquirySubmission	A class that manages deletion of inquiries that have not been assigned.
PublicUser.Submission History	A class that allows public users to view their previously submitted inquiries and current status.
MCMC.Dashboard	MCMC home page showing navigation to new or filter inquiries, assignments, etc.
MCMC.InquiryList	A class that displays newly submitted inquiries from the public user that have not been approved and assigned, allows MCMC to select submitted inquiries and sort or search inquiries by date, agency, etc.
MCMC.InquiryApproval	A class that shows full inquiry details for MCMC review.

Table 3.3 Inquiry Assignment Package [SDD-MSS-2025v1-P03]

Class Name	Description
MCMC.Dashboard	MCMC home page showing navigation to new or filter inquiries, assignments, etc.
MCMC.Assignment List	A class that lists inquiries that are pending or already assigned to specific agencies.
MCMC.AssignInquiry	A class that allows the MCMC to assign an inquiry to an appropriate agency.
Agency.Dashboard	Home page for agency showing assigned inquiries and actions required.
Agency.AssignInquiryList	A class that displays inquiries currently assigned to the logged-in agency.
Agency.AssignInquiryDetail	A class that shows full detail of a selected assigned inquiry including submission content and MCMC notes.
Agency.InquiryFilter	A class that allows agencies to filter their list of assigned inquiries by date, status, etc.

Table 3.4 Progress Tracking Package [SDD-MSS-2025v1-P04]

Class Name	Description
PublicUser.Dashboard	Main dashboard for public users that give access to submission form, view past submissions and status of submission.
PublicUser.Progress Status	A class that allows public users to track the progress of their submitted inquiries.
MCMC.Dashboard	MCMC home page showing navigation to new or filter inquiries, assignments, etc.
MCMC.InquiryProgressList	A class that allows MCMC monitor the progress updates submitted by agencies on assigned inquiries.
MCMC.ProgressDetail	A class that shows a detailed view of progress noted and attached documents provided by the agency.
Agency.Dashboard	Home page for agency showing assigned inquiries and actions required.
Agency.ProgressUpdateForm	A class that shows a form for agencies to update progress status like action taken on assigned inquiries.
Agency.ProgressHistory	A class that allows agency view of previously submitted progress reports for record and auditing purposes.

3.2 BUSINESS SERVICES LAYER

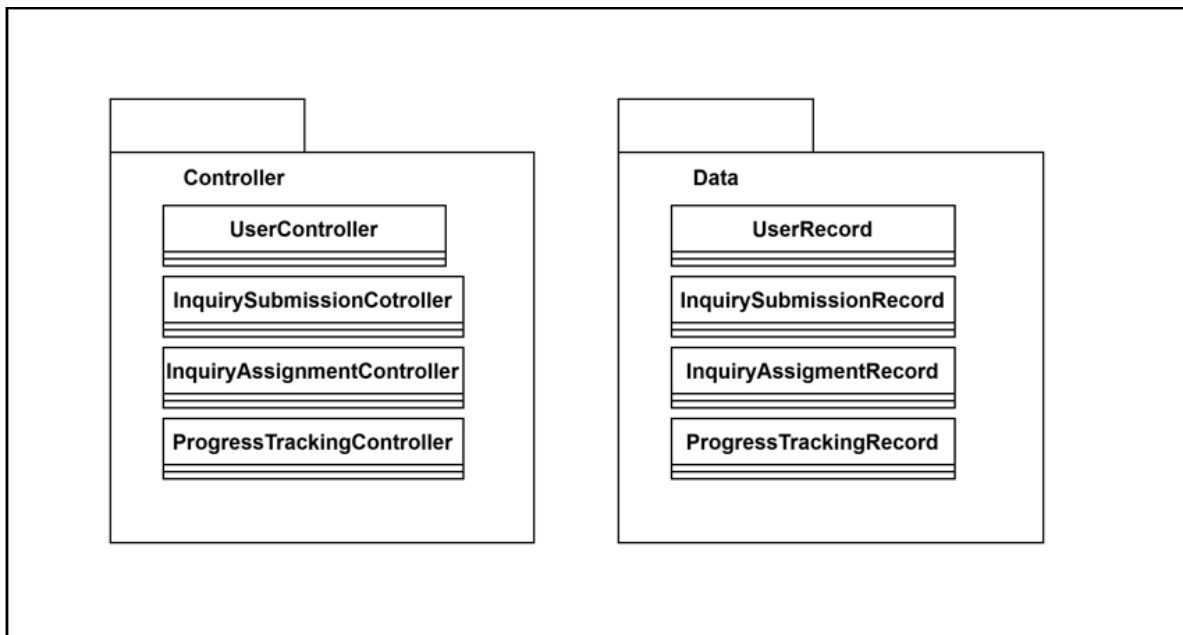

Figure 3.2 Business Services Layer for MySebenarnya Systems

Table 3.5 Controller Package [SDD-MSS-2025v1-P05]

Class Name	Description
UserController	A class that manages all user-related operations including registration, login or logout, profile view or update and directing users to appropriate dashboards based on role.
InquirySubmissionController	A class that manages all logic related to inquiry submission, validation, history viewing for public users and filtering of inquiries before assignment for MCMC.
InquiryAssignmentController	A class that manages the assignment process for MCMC, displays assigned inquiries for the agency and logs the actions performed for tracking.
ProgressTrackingController	A class that manages submission of progress updates for the agency, display of progress to public users and monitoring of status updates for MCMC.

Table 3.6 Data Package [SDD-MSS-2025v1-P06]

Class Name	Description
UserRecord	A class that represents the user's information stored in the system including details for all types of users. Handles basic role-checking and supports login, registration and profile updates.
InquirySubmissionRecord	A class that stores information about inquiries submitted by public users including content, date, etc. Supports form validation and holds submission details.
InquiryAssignmentRecord	A class that tracks the assignment of each inquiry to an agency by MCMC. Links a submission with the agencies assigned to investigate it.
ProgressTrackingRecord	A class that stored progress updates from agencies regarding assigned inquiries.

3.3 MIDDLEWARE LAYER

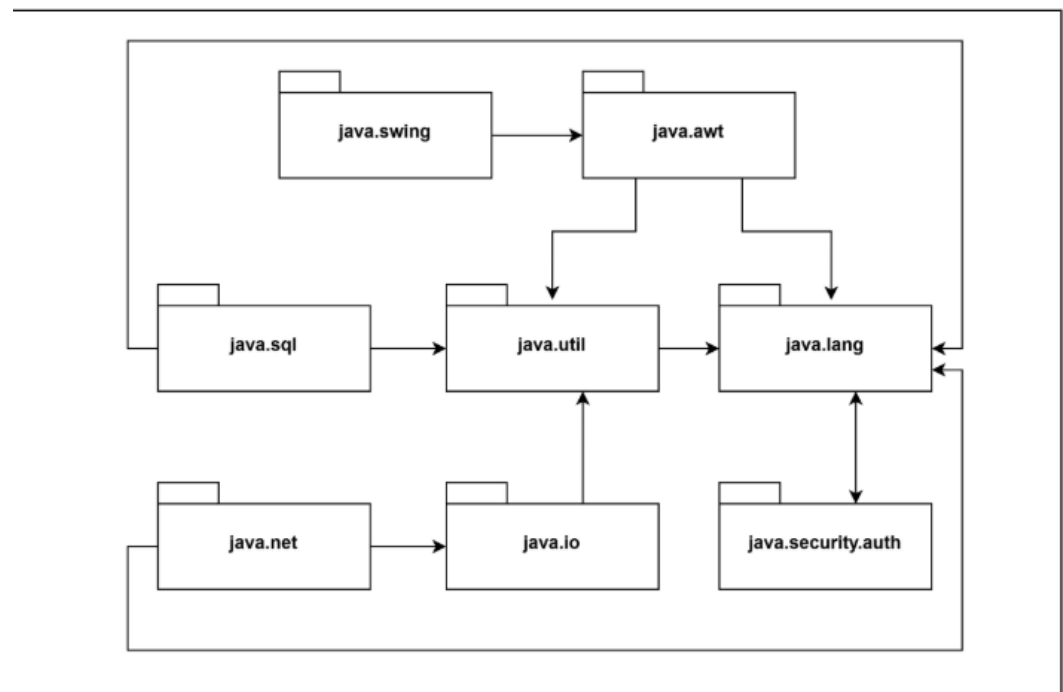

Figure 3.3 Middleware Layer for MySebenarnya Systems

Table 3.7 Middleware Description

Package Name	Description
java.swing	Provides classes for building graphical user interfaces (GUIs) with components like buttons, panels, and tables.
java.awt	Contains classes for creating user interfaces and handling events, graphics, and layout management.
java.sql	Offers classes and interfaces for accessing and managing relational databases using SQL.
java.util	Provides utility classes such as data structures, date and time facilities, random number generation, and more.
java.lang	Includes fundamental classes essential to the Java language, like Object, String, Math and System.
java.net	Supports networking features such as sockets, IP addressing, and URL handling.
java.io	Enables input and output through data streams, serialization, and file system operations.
java.security.auth	Provides classes for authentication and authorization services within security frameworks.

3.4 PACKAGE RELATIONSHIP

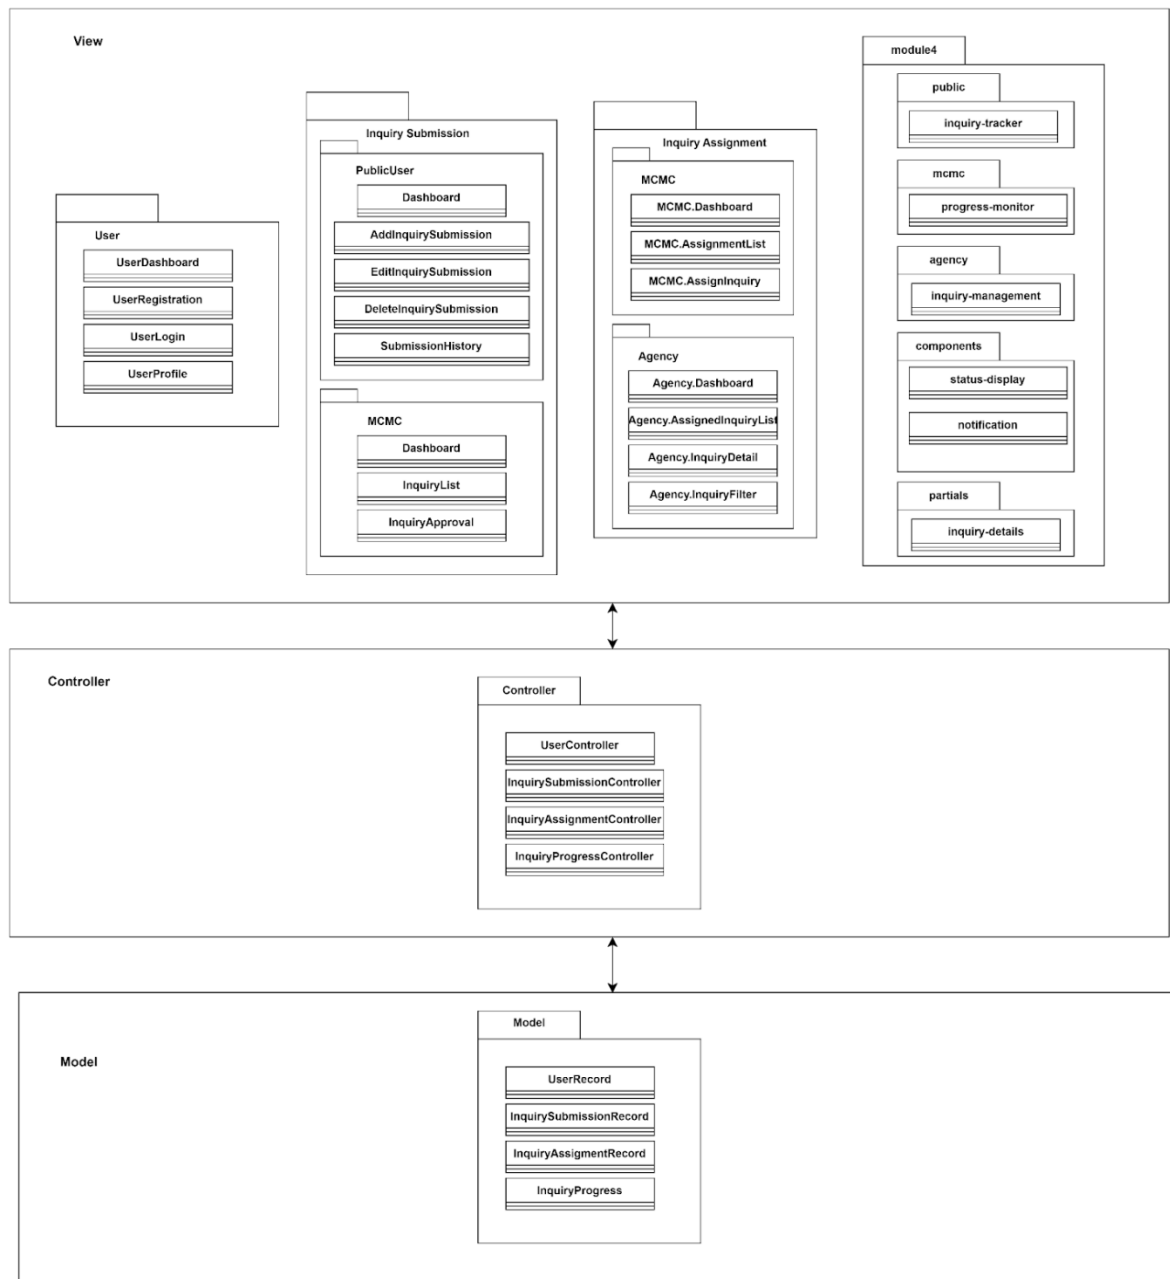

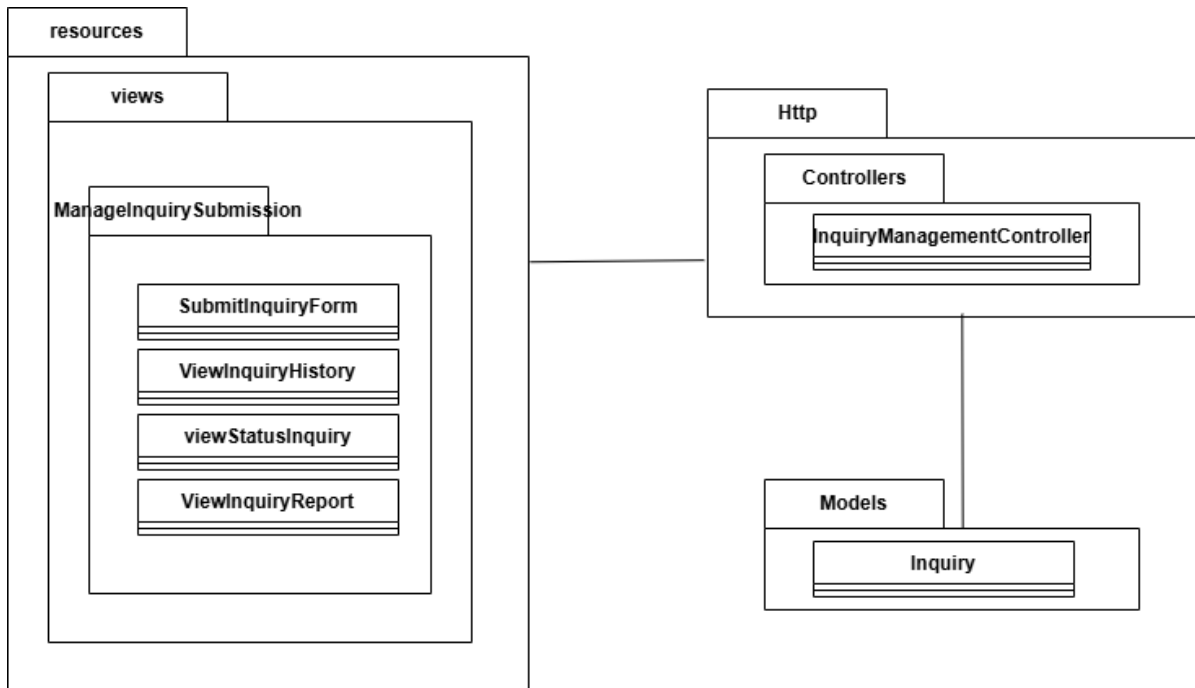

Figure 3.4 Model View Controller (MVC) Package Relationship for Sebenarnya.My Systems

The system utilizes the design pattern known as Model-View-Controller (MVC). The architecture of this system is composed of three distinct layers, which are as follows:

- 1) Model: Represents the application's business logic and data handling.
- 2) View: Manages the user interface and displays data from the model.
- 3) Controller: Acts as a bridge between View and Model, handling user input and application logic

The MVC pattern's modular structure allows the system to be highly maintainable and scalable. Changes to one component, such as altering the View's design or updating the Model's database schema, can be made without significantly impacting the others. Additionally, the pattern is particularly well-suited for object oriented programming, as each component can leverage encapsulation, inheritance, and polymorphism to streamline functionality and ensure code reuse. This makes MVC an ideal choice for the "MySebenarnya" system, where multiple user roles and modules must function cohesively and efficiently.

4. DETAIL DESIGN

4.3 Module 3: Inquiry Assignment to Agencies

4.3.1 Public User\ Dashboard [SDD-MSS-2025v1-P01-C01]

Class Type	Boundary	
Responsibility	Graphical interface for logged-in users: access point for inquiries	
Attributes	Attributes Name	Attributes Type
	Auth::user()->id	int
Methods	Method Name	Description
	@extends('layout.app')	Inherits the base layout from layout.app.
	@section('content')	Defines the content section to inject into the layout.
	route('inquiry.create')	Navigate to new inquiry form.
	route('inquiry.history')	Navigate to user's submitted and view their form.
	route('logout')	Submits a POST request to log the user out.
Algorithm	1. Load layout using layouts.app. 2. Render greeting with user name: "Public User Dashboard" and welcome message.	

SDD-MSS-2025v1

	3. Display two cards: a. Card 1: - Title: "Submit New Inquiry" - Button: "New Inquiry" - Action: Redirect to inquiry.create route when clicked. b. Card 2: - Title: "View My Inquiries" - Button: "My Inquiries" - Action: Redirect to inquiry.history route when clicked. 4. Render page in container layout with Bootstrap classes.
--	--

4.3.2 InquiryAssignmentView [SDD-MSS-2025v1-P01-C02]

Class Type	Boundary class	
Responsibility	Display list of public inquiries to MCMC Staff and provide an interface to assign them to agencies	
Attributes	Attributes Name	Attributes Type
	Inquiry_list	Array
	Selected_agency_id	Integer
	Assignment_status	Enum
Methods	Method Name	Description
	displayInquiries()	Show list of unassigned inquiries
	assignAgencies()	Assign selected inquiry to agencies
	showFeedback()	Show assignment success/failure.
Algorithm	1. Fetch all inquiries with status = "unassigned" from the controller. 2. Display inquiries in a table format with relevant details (e.g., title, submitted_by, category). 3. For each inquiry, provide a dropdown list of agencies. 4. When MCMC staff selects an agency and clicks "Assign": • Send a POST request to /assign-agency/{inquiry_id} with the selected agency_id. 5. If assignment is successful: • Display success message.	

	- Refresh the list to remove the newly assigned inquiry. 6.If failure: - Display error message ("Please select an agency").
--	---

4.3.3 InquiriesAssignController [SDD-MSS-2025v1-P01-C03]

Class Type	Controller class	
Responsibility	Handles logic for assigning inquiries to suitable agencies based on MCMC selection	
Attributes		
Methods	Method Name	Description
	showAssignments()	Returns the list of unassigned inquiries for display
	assignToAgencies()	Receives inquiry ID and agenciesID, updates assignment record
Algorithm	1. Validate agency ID must be provided. 2. Retrive inquiries by \$inquiries_id. 3. Set agency_id = \$request->agency_id, status= 'assigned', assigned_at=now(). 4. Save the updated inquiry. 5. Optionally notify the assigned agency. 6. Return redirect with success.	

4.3.4 Inquiry [SDD-MSS-2025v1-P01-C04]

Class Type	Model	
Responsibility	Represents public submitted inquiries in the system	
Attributes	Attributes Name	Attributes Type
	Auth::user()->id	integer
	title	String
	Description	Text
	Submitted_by	Integer
	Status	Enum(unassigned, assigned, resolved)
	agency_id	Integer
	assigned_at	Timestamp
Methods	Method Name	Description
	agency()	Relationship to assigned agency
	publicUser()	Relationship to public user
Algorithm	use eloquent relationship <pre>public function agency() { return \$this->belongsTo(AgencyUser::class); }</pre> - When a public user submits a new inquiry: - Collect input: title, description, source, category, and evidence. - Validate fields and file upload. - Store inquiry with: - status = "unassigned" - submitted_by = Auth::id() - created_at = now() - When MCMC assigns the inquiry: - agency_id is set based on selection. - assigned_at timestamp is recorded. - status is updated to "assigned". - When agency resolves the inquiry (optional future feature): - status can be updated to "resolved" with a response or document.	

4.3.4 AgencyUser [SDD-MSS-2025v1-P01-C05]

Class Type	Model	
Responsibility	Represents agency staff who receive inquiries assigned by MCMC staff	
Attributes	Attributes Name	Attributes Type
	Auth::user()->id	integer
	Name	String
	Email	String
	Contact	String
	agent_type	String
	mcmc_staff_id	Integer
Methods	Method Name	Description
	Inquiries()	Returns assigned inquiries
Algorithm	1.MCMC staff creates an agency: • Validate inputs: name, email, password, contact, agency_type. • Hash password securely. • Set: ◦ RoleID = 2 ◦ AgencyFirstLogin = true ◦ MCMCID = Auth::guard('mcmc')->id(); • Save agency to agency_users table. 2. Agency logs in using email and password. 3. Agency can access inquiries assigned to them via: • Inquiry::where('agency_id', Auth::id())->get(); 3. (Optional) Agency can update inquiry status and add response content.	

4.3.5 AssignmentStatusView [SDD-MSS-2025v1-P01-C06]

Class Type	Boundary class	
Responsibility	Allow agencies to view all inquiries assigned to them and optionally update inquiry statuts.	
Attributes	Attributes Name	Attributes Type
	Auth::user()->id	integer
	inquiry_id	String
	title	String
	description	String
	Submitted_by	String
	status	Integer
	response	Text
Methods	Method Name	Description
	displayAssignment()	Display all inquiries assigned to the logged in agency
	showDetails(\$id)	Shows detailed information for a selected inquiry
	submitResponse()	Submits an update to inquiry status and agency response
	showFeedback()	Display success or failure message
Algorithm	1. Retrieve logged-in agency user: • \$agency = Auth::guard('agency')->user(); 2. Fetch all inquiries assigned to this user: • Inquiry::where('agency_id', \$agency->id)->get(); 3. Pass the inquiry list to a Blade view for display: • Title, status, assigned_at, short description. 4. Find inquiry by ID: • \$inquiry = Inquiry::findOrFail(\$id); 5. Ensure it belongs to the currently authenticated agency: • if (\$inquiry->agency_id != Auth::id()) abort(403); 6. Pass inquiry data to detail view. 7. Validate input: • Response is not empty. • Status must be a valid option (resolved, etc.).	

SDD-MSS-2025v1

	8. Retrieve the inquiry by inquiry_id. 9. Check ownership (must belong to the authenticated agency). 10. Update the inquiry: • \$inquiry->status = 'resolved'; • \$inquiry->response = \$request->response; • \$inquiry->responded_at = now(); 11. Save changes and redirect with success message: • return back()->with('message', 'Inquiry resolved successfully.'); 12. If the operation (status update) was successful: • Show confirmation message using session flash. 13. If failure: • Display specific validation or permission error messages.
--	---

5. REQUIREMENT TRACEABILITY

5.1 Module 3: Inquiry Assignment to Agencies

Requirement ID	Description	Design ID
SDD-MSS-2025v1-R13	Display unassigned inquiries to MCMC staff	SDD-MSS-2025v1-P03-C01 SDD_REQ_301
SDD-MSS-2025v1-R14	Enable MCMC to assign inquiry to specific agency	SDD-MSS-2025v1-P03-C02 SDD_REQ_201
SDD-MSS-2025v1-R15	Update inquiry assignment status	SDD-MSS-2025v1-P03-C03 SDD_REQ_401
